

Oracle

Exam 1z0-436

**Oracle BigMachines CPQ Cloud Service 2016 Implementation
Essentials**

Verson: Demo

[Total Questions: 10]

Question No : 1

What does the Internal status signify in a Configuration rule?

- A. The rule must fire if a condition is satisfied.
- B. The rule does not fire even if a condition evaluates to true.
- C. The rule fires only if a condition is satisfied and the user is of type FullAccess.
- D. The rule fires regardless of the condition.

Answer: A

Question No : 2

You have implemented a Commerce Hiding rule, which has an Advanced action. While unit testing, you find that the attributes specified in the rule aren't getting hidden, even though the specified condition evaluates to true.

What are two possible reasons for this behavior?

- A. Config was not deployed after the rule was implemented.
- B. Commerce was not deployed after the rule was implemented.
- C. There is a syntax error in the Advanced condition.
- D. The rule is inactive.

Answer: A,C

Question No : 3

Which operation is allowed in BMQL query?

- A. SELECT,INSERTandUPDATE
- B. SELECT
- C. SELECTandUPDATE
- D. SELECT,INSERTandDELETE

Answer: B

Question No : 4

To add items (parts) to a configuration, Recommended Item rules are used. Which two statements are true when using Recommended Item rules?

- A. Recommended Item rules can return only the base price of an item (part) and cannot use dynamic prices based off data tables.
- B. If multiple Recommended Item rules recommend the same item(part), the item (part) price is picked from the rule that is last in the order.
- C. If multiple Recommended Item rules return the same item (part), the quantity of the item (part) is a total of all quantities returned by each rule.
- D. Recommended Item rules can show only the base prices defined in the customer specific module.

Answer: B,D

Question No : 5

What is the correct order of execution of Configuration rules for an attribute that has both Recommendation and Constraint rule written on it?

- A. Hiding, Constraint, Recommendation, Recommended Item
- B. Recommendation, Recommended Item, Hiding, Constraint
- C. Recommendation, Constraint, Recommendation, Hiding, Recommended Item
- D. Constraint, Hiding, Recommendation, Recommended Item

Answer: A

Question No : 6

Which rule is used to hide menu options in a single-select configurable attribute?

- A. Hiding rule
- B. Constraint rule
- C. Pricing rule
- D. Recommendation rule
- E. Recommended Item rule

Answer: B

Question No : 7

Identify a situation in which the Add to Quote button will be displayed in the configuration page, after the configuration flow is executed for the first time.

- A. when there are no active constraint rules and the configuration flow has this page defined as End Node
- B. when the configuration flow has this page defined as Transition Node
- C. when there are active constraint rules and the configuration flow has this page defined as End Node
- D. when there are no missing parts in Recommended Items

Answer: C

Question No : 8

What is a recommended approach to keep in mind when implementing the Commerce pricing function?

- A. Ensure that parts and prices are added in the part database.
- B. Ensure that the part database is indexed.
- C. Use data structures such as dictionaries to store line information that needs to be referenced later in the code. A hash is faster than looping each time.
- D. Ensure that Ajax is enabled.

Answer: A

Question No : 9

Which two statements are true about parts integration?

- A. A BigMachines parts database can be integrated only with Salesforce.
- B. BigMachines or a third-party system can be used to maintain parts data.
- C. Salesforce cannot store parts as products, so you must store parts and price book associations in BigMachines.
- D. BigMachines can support parts integration with any system via FTP upload.

Answer: A,B

Question No : 10

While configuring a product, which pricing is applied last on a given item (part) after it is added to a valid configuration?

- A. Recommended Item Pricing
- B. Base Price from the parts database
- C. List price from the PriceBook
- D. Attribute Value Pricing

Answer: A
