

Cisco Automating Cisco Collaboration Solutions Exam

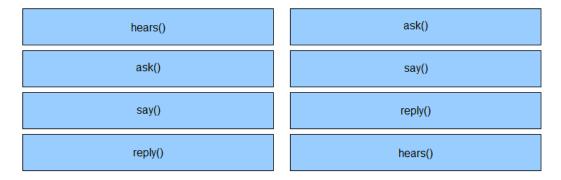

Questions & Answers Demo

Answer:

Version: 5.0

Question: 1				
What is a benefit of using Python virtual enviro	nments?			
A. It isolates dependencies of every project from B. It allows Python to differentiate between part C. It frees the developer from installing the proposition. It puts dependent packages in a common site.	ckage versions. ject dependencies.			
	Answer: A			
Question: 2				
DRAG DROP Drag and drop the botkit functions from the left onto the correct actions on the right. Answer Area				
hears()	Adds a question to the thread and evaluate the answer.			
ask()	Sends a message with no pause for response.			
say()	Replies to an incoming message.			
reply()	Listens for keyword, phrases, or patterns in messages from users.			

Answer Area

Question: 3

Refer to the exhibit.

Which code snippet is used to mention the bot CiscoDevNet@webex.bot?

- A. <@personEmail.CiscoDevNet@webex.bot>
- B. @CiscoDevNet@webex.bot
- C. @personEmail.CiscoDevNet@webex.bot
- D. (@personEmail.CiscoDevNet@webex.bot)

Answer: B

Question: 4

DRAG DROP

An administrator is creating a script using the Python xAPI over WebSockets (py xows) library. The goal of the script is to capture an event generated by a UI Extensions action button (former In-Room Control Panel).

When the action button is clicked, the script displays an alert that says that the button ID was clicked. Drag and drop the code snippets into the locations to complete the script:

Answer Area

```
await client.xCommand(['UserInterface', 'Message', 'Alert', 'Display'], Title=panelid, Text= "Was clicked")

panelId = data['Event']['UserInterface']['Extensions']['Panel']['Clicked']['PanelId']

await start('10.10.10.1', 'admin', 'T357c45e')

await client.subscribe(['Event', 'UserInterface', 'Extensions', 'Panel', 'Clicked'], callback, True)

asyncio.run(task())
```

Answer:

Answer Area

```
await client.xCommand(['UserInterface', 'Message', 'Alert', 'Display'], Title=panelid, Text= "Was clicked")

panelId = data['Event']['UserInterface']['Extensions']['Panel']['Clicked']['PanelId']

await start('10.10.10.1', 'admin', 'T357c45e')

await client.subscribe(['Event', 'UserInterface', 'Extensions', 'Panel', 'Clicked'], callback, True)

asyncio.run(task())
```

Question: 5

DRAG DROP

Drag and drop the code to complete the curl command that creates a halfwake brand logo using the xAPI HTTP API. Not all options are used. Code can be used more than one time.

Answer Area
