

# Cisco

## Exam 700-603

### UCSInvictefor Field Engineers

Verson: Demo

[ Total Questions: 10 ]

**Question No : 1**

Which option is the typical approach used to scale Hadoop data nodes?

- A. Deployment of several specialized high-performance compute supercomputers
- B. A scale-out model on commodity servers with ordinary JBOD
- C. A scale-out model on commodity servers with specialized RAID configurations
- D. A scale-up model using nodes with significant expansion options

**Answer: C**

**Question No : 2**

Which two options are two characteristics of Hadoop? (Choose two.)

- A. It relies on complex star schema designs to efficiently handle decision support queries.
- B. It relies on distributed parallel processing.
- C. It is a very large OLTP database engine.
- D. It relies on a few very expensive compute platforms.
- E. It is a single appliance that integrates both software and hardware.
- F. It is an open source, batch data processing system.

**Answer: B,F**

**Question No : 3**

In which three ways does thin provisioning increase latency? (Choose three.)

- A. Each read has to be block translated
- B. An update of the physical to logical map has to be made
- C. The disk needs to be zeroed out.
- D. Capacity is statically allocated.
- E. Each write has to be block translated
- F. Thin provisioning requires mirrored storage, which doubles the typical latency.

**Answer: B,C,E**

**Question No : 4**

Which two characteristics are common to OLAP and data warehouse operations? (Choose two.)

- A. Large sequential writes
- B. Large read I/O sizes
- C. Extremely high volume of small random read operations
- D. Extremely high volume of small random write operations
- E. Large sequential reads

**Answer: B,E**

**Question No : 5**

Which settings must be configured on the management interface bond?

- A. IP address, subnet mask, MTU, mode, and boot order
- B. IP address, subnet mask, MTU, and mode
- C. IP address and subnet mask
- D. MAC address, IP address, subnet mask, and MTU
- E. MAC address, subnet mask, MTU, and mode

**Answer: B**

**Question No : 6**

How does Cisco UCS Invicta v5x provide scalability?

- A. Scale up
- B. Scale out
- C. Scale up/scale out
- D. Only half of the drive bays are populated when shipped by Cisco, allowing the customer to purchase additional drives to expand capacity when needed.
- E. Scale down

**Answer: C**

**Question No : 7**

Which three services does Cisco UCS Director provide? (Choose three.)

- A. Trouble ticketing
- B. Orchestration
- C. Policy management
- D. Layer 3 device configuration
- E. Self-service portal
- F. Invoice creation and billing

**Answer: B,C,E**

**Question No : 8**

Which management platform does Cisco envision as the centralized control point for the data center including the Cisco UCS Invicta?

- A. Data Center Network Manager
- B. Cisco Intelligent Automation for Cloud
- C. Cisco UCS Director
- D. Cisco UCS Centr
- E. Cisco UCS Manager

**Answer: C**

**Question No : 9**

Which statement describes a boot storm in a VDI environment?

- A. A performance problem caused by slow hard drives
- B. A problem that occurs when a large portion of your ESXi hosts are forced to reboot at the same time
- C. A performance problem caused by inadequate network bandwidth
- D. A performance problem that occurs when a large group of users boot their virtual desktop instances within a small window of time

E. A performance problem that occurs when a large group of users log into their virtual desktop instances within a small window of time

**Answer: B**

**Question No : 10**

Which three form fields are required when creating a LUN snapshot? (Choose three.)

- A. SSN ID
- B. Origin LUN
- C. Snapshot ID
- D. Volume
- E. Snapshot Name
- F. Snapshot Size (GB)

**Answer: B,E,F**
