**Certified Technology Consultant – SAP S/4HANA System
Administration**

**Questions & Answers
Demo**

Version: 4.2

Question: 1

What action(s) can you perform in the SAP HANA cockpit to back up the complete database system?

- A. Back up the system database and all tenant databases individually.
- B. Back up the system database and all tenant databases in one step.
- C. Back up the system using a fallback snapshot for every database.
- D. Back up the system using a database snapshot and a data snapshot

Answer: A

Question: 2

How does a Transport of Copies differ from a Workbench Request? Note: There are 2 correct answers to this question

- A. After the import, repository objects in the target system are classified as copies.
- B. When creating the transport request, a target system without a consolidation route can be selected.
- C. No cofile is created, when releasing the transport request with the Transport Organizer (SE09).
- D. When importing, the transport request is not forwarded to subsequent delivery systems.

Answer: C, D

Question: 3

In an AS ABAP-based SAP system, a user performs the second dialog step in a dialog transaction. The dialog work process used in the first dialog step is occupied by a different user. What happens with this second user request?

- A. The dialog work process that handled the first dialog step performs a rollout to handle the request.
- B. The request is processed asynchronously by an update work process.
- C. The request remains in the request queue until the dialog work process that handled the first dialog step is free again.
- D. The request is processed by a different free dialog work process.

Answer: D

Question: 4

When importing a transport request, which steps are executed by a batch job? Note: There are 3 correct answers to this question.

- A. Import of dictionary objects
- B. Distribution
- C. Activation of dictionary objects
- D. Move nametab
- E. Activation of ABAP programs

Answer: A, C, D

Question: 5

You are using a Change and Transport System (CTS) for the transport of native SAP HANA applications. Which tool can you use to create a transport request for these applications in the CTS system?

- A. Transport Organizer Web UI (in transaction STMS)
- B. Transport Organizer (Extended View) (in transaction SE01)
- C. Transport Organizer (in transaction SE09)
- D. Database Assistant (in transaction DB50N)

Answer: A
