## Question: 1

---

A customer has several branch offices with Dell EMC Data Domain integrated with Avamar deployed at all locations. The branch offices have minimal IT staff. The customer wants to keep a copy of the backups at their central data center which serves as their headquarters with a maximum IT staff. In addition, the customer wants to keep a copy in their public cloud account.

Which recommended solution meets the customer's requirements?

- A. Branch offices: Avamar/Data Domain replication to the central data center and Avamar tiering to the public cloud  
Central data center: Avamar/Data Domain replication destination
- B. Branch offices: Data Domain MTree replication to the central data center  
Central data center: Data Domain with Cloud Tier and Data Domain tiering to the public cloud
- C. Branch offices: Avamar/Data Domain replication to the central data center  
Central data center: Avamar/Data Domain with Cloud Tier and Avamar tiering to the public cloud
- D. Branch offices: Data Domain MTree replication to the central data center and Data Domain tiering to the public cloud  
Central data center: Data Domain MTree replication destination
