Answer: A

Question No : 4

What does an HFS check do?

A. Validates the integrity of a checkpoint
B. Performs server checkpoint rollbacks
C. Performs a snapshot of an Avamar server
D. Checks for RAID controller errors

Answer: C

Question No : 5

What are the three O/S user accounts that are used by the EMC Avamar server for authentication?

A. root, admin, and dpn
B. root, MCUser, and repluser
C. admin, MCUser, and repluser
D. root, dpn, and MCUser

Answer: A

Question No : 6

A storage node in a multi-node Avamar server has failed and a replacement node has been added to the grid. What is used to reconstruct the data on the new node?

A. RAIN
B. RAID
C. Checkpoint
D. Replication

Answer: A

Question No : 7

In an EMC Avamar backup operation, which process always produces identical chunk results given the same data?

A. Sticky-byte factoring
B. Compression
C. File caching
D. Hashing

Answer: A

Question No : 8

An EMC Avamar Gen4 server has arrived at a customer's site. You begin reviewing the hardware for an Avamar 6 installation. You find that two of the five nodes are Gen3 running RHEL OS and the others are running SLES OS.

Can you proceed with the install?

A. No. All nodes in a Gen4 server must be Gen4 running SLES OS.
B. Yes. The two nodes running RHEL can be re-kickstarted with SLES OS.
C. Yes. The three nodes running SLES can be re-kickstarted with RHEL OS.
D. No. All nodes in a Gen4 server must be Gen4 running RHEL OS.

Answer: A

Question No : 9

Which EMC Avamar replication mode allows for many-to-one and bi-directional replication?

A. Normal
B. Failover
C. Root-to-root
D. Selective root-to-root

Answer: A

Question No : 10

Which interface is used to start Avamar Client Manager?

A. Enterprise Manager
B. Command Line
C. cron job
D. Avamar Administrator

Answer: A
