Question: 1	
All of the following elements are required in the Application Architecture Ba	seline Document except
<ul> <li>A. architecture models of the candidate system(s)</li> <li>B. business and organization units supported</li> <li>C. precedent and successor applications</li> <li>D. owner(s) or business unit(s) responsible for requirements</li> <li>E. hardware and software platforms used</li> </ul>	
	Answer: A
Question: 2	
Which of the following would be a potential downstream use of the qualitat application architecture	ive criteria for the
A. managing code quality B. generating service level agreements C. regression testing D. gap analysis E. All of the above	
	Answer: B
Question: 3	
The TOGAF Technical Reference Model	
A. is intended as an example and should be tailored to the organization's need. B. must be used "as is" for developing comprehensive architecture models. C. contains several industry specific frameworks. D. is intended to contain the Enterprise Continuum. E. contains only solution building blocks.	eds
	Answer: A
Question: 4	

Which of the following statements about architecture principles is most true?

- A. Architecture principles must be tailored to the requirements of a given architecture project
- B. Architecture principles are intended to be enduring and seldom amended
- C. Architecture principles cannot transcend the organization's business strategies and objectives
- D. Executive Management can define principles as a means of enforcing compliance to its policies

	Answer: B
Question: 5	
During Phase E - Opportunties and Solutions, a gap analysi	is can be used to compare the
between the as-is and the to-be architecture.	
A. requirements B. Solution Building Blocks	
C. Architecture Building Blocks	
D. business functions E. standards	
	Answer: D
Question: 6	
A. To establish the IT Governance framework that will be u	
What is the objective of Phase F?  A. To establish the IT Governance framework that will be u B. To sort the implementation projects into priority order f C. To implement change management processes that will b projects. D. To validate the architecture vision. E. All of these tasks	for implementation and migration.
A. To establish the IT Governance framework that will be u B. To sort the implementation projects into priority order f C. To implement change management processes that will b projects.  D. To validate the architecture vision.	for implementation and migration.
A. To establish the IT Governance framework that will be u B. To sort the implementation projects into priority order f C. To implement change management processes that will b projects. D. To validate the architecture vision. E. All of these tasks	for implementation and migration. be used to manage the implementation
A. To establish the IT Governance framework that will be u B. To sort the implementation projects into priority order f C. To implement change management processes that will b projects.  D. To validate the architecture vision.	for implementation and migration. be used to manage the implementation  Answer: B
A. To establish the IT Governance framework that will be u B. To sort the implementation projects into priority order f C. To implement change management processes that will b projects. D. To validate the architecture vision. E. All of these tasks  Question: 7  What are the key inputs to Phase G - Implementation Gove A. reusable solution building blocks	for implementation and migration. be used to manage the implementation  Answer: B
A. To establish the IT Governance framework that will be u B. To sort the implementation projects into priority order f C. To implement change management processes that will b projects. D. To validate the architecture vision. E. All of these tasks  Question: 7  What are the key inputs to Phase G - Implementation Gove A. reusable solution building blocks B. statement of architecture work	for implementation and migration. be used to manage the implementation  Answer: B
A. To establish the IT Governance framework that will be u B. To sort the implementation projects into priority order f C. To implement change management processes that will b projects. D. To validate the architecture vision. E. All of these tasks  Question: 7  What are the key inputs to Phase G - Implementation Gove A. reusable solution building blocks B. statement of architecture work C. request for architecture work	for implementation and migration. be used to manage the implementation  Answer: B
A. To establish the IT Governance framework that will be up. To sort the implementation projects into priority order for the conference of the implement change management processes that will be projects.  D. To validate the architecture vision.  E. All of these tasks  Question: 7  What are the key inputs to Phase G - Implementation Governments.	for implementation and migration. be used to manage the implementation  Answer: B
A. To establish the IT Governance framework that will be used. To sort the implementation projects into priority order for implement change management processes that will be projects.  D. To validate the architecture vision.  E. All of these tasks  Question: 7  What are the key inputs to Phase G - Implementation Governance and the projects of the projects of the projects.  A. reusable solution building blocks  B. statement of architecture work  C. request for architecture work  D. all of these items	for implementation and migration. be used to manage the implementation  Answer: B
To establish the IT Governance framework that will be u. To sort the implementation projects into priority order f. To implement change management processes that will k rojects.  To validate the architecture vision.  All of these tasks  Question: 7  What are the key inputs to Phase G - Implementation Governance in the solution building blocks.  reusable solution building blocks.  statement of architecture work.  request for architecture work.  all of these items	for implementation and migration. be used to manage the implementation.  Answer: B  ernance?
A. To establish the IT Governance framework that will be used. To sort the implementation projects into priority order for implement change management processes that will be projects.  D. To validate the architecture vision.  E. All of these tasks  Question: 7  What are the key inputs to Phase G - Implementation Governance and the projects of the projects of the projects.  A. reusable solution building blocks  B. statement of architecture work  C. request for architecture work  D. all of these items	for implementation and migration. be used to manage the implementatio  Answer: B

As the ADM cycle is completed for a given architecture program, the architecture staff is responsible for
<ul> <li>A. Project planning</li> <li>B. Final appraisal of the implemented architecture</li> <li>C. Ongoing monitoring of business and technology changes related to the architecture work</li> <li>D. Implementation Governance</li> <li>E. Internal marketing of the solution</li> </ul>
Answer: C
Question: 9
When can new requirements be added to the requirement management repository?
A. during each phase of the ADM B. at the Architecture Vision phase C. anytime during Phases A through D D. only upon completion of a business scenario E. when submitting the Request for Architecture Work
Answer: A
Question: 10
Who usually initiates a Request for Architecture Work?
A. the sponsoring organization B. the architecture organization C. the CIO/CTO D. the architecture governance board E. senior management
Answer: A
Question: 11
A Technical Architecture Report should contain all of these items except
A. requirements traceability analysis B. project impact analysis C. technology architecture models D. technical specification for each building block E. gap analysis report

	Answer: B
Question: 12	
The final version of an Impact Analysis should conta	ain all of the following except
A. prioritized projects	
B. enhanced budget forecasts	
C. time ordered sequencing D. Implementation recommendations	
E. measures of effectiveness	
	Answer: B
Question: 13	
Which of the following would be a good example of	f an infrastructure application?
A. Virtual Private Network	
B. System and Network Management system	
C. e-Mail	
D. Office (desktop) software	
E. All of these	
	Answer: E
Question: 14	
In the high level Technical Reference Model	
A. all of these	
B. the application directly communicates to the out	
C. the application communicates with the application infrastructure	on platform through the communications
interface	
D. it is possible to analyze performance crtieria	
E. the communication infrastructure is very diverse	
·	
	Answer: E
Question: 15	
The Architecture Continuum the Solutions Co	ontinuum.

A. drives	
B. is driven by	
C. is designed to satisfy	
D. is based on	
E. guides and supports the evolution of	
	Answer: E
Question: 16	
The U.S. Department of Defense C4ISR Architecture framework (now D0 architecture model with three views. Which of these sets of views is pro-	
A. logical, physical, financial	
B. operational, technical, systems	
C. logical, physical, operational	
D. strategic, tactical, operational	
E. strategic, systems, operations	
	Answer: B
Question: 17	
Which of the following is not true about the nature of governance?	
A. All of these are characterisitics of governance.	
B. Provides guidance on the effective use of resources to achieve the or	ganization's strategic
objectives	-
C. Ensure that all actions and related decisions are available to be exam	ined by authorized parties
D. All decisions taken, processes used and their implementation will no	t be allowed to create unfair
advantage to	
any one particular party.	
E. All involved parties have a commitment to adhere to procedures, pro	cesses and authority
structures established	
by the organisation.	
	Answer: A
Question: 18	
In TOGAF's Architecture Governance organizational structure, which gro	oup is chiefly responsible for
deployment and operations?	

A. domain architectsB. IT service management

C. Chief Information Officer/Chief Technology Officer

D. program management office E. technical support	
	Answer: B
Question: 19	
Typically, business goals and drivers have already been established is not true, what process should be followed?	and need only be validated. If this
A. Resequence the project to occur later in the overall program B. The team should work with the project sponsor to create a set of validate those goals and objectives with top management C. The project team should create a set of placeholder goals and ob D. Place the project on hold until a suitable set of business goals and	pjectives
management E. Benchmark with a similar, noncompeting organization, and adop goals and objectives	t their best practices for business
management E. Benchmark with a similar, noncompeting organization, and adop goals and	t their best practices for business  Answer: B
management E. Benchmark with a similar, noncompeting organization, and adop goals and	
management  E. Benchmark with a similar, noncompeting organization, and adop goals and objectives	Answer: B
management E. Benchmark with a similar, noncompeting organization, and adop goals and objectives  Question: 20	Answer: B
