PEGAPCLSA86V2 Exam

Lead System Architect (LSA) Pega Architecture Exam 86V2

Questions & Answers

Demo

Version: 4.0

Question: 1

DRAG DROP

You are managing distributed, geographically dispersed, development teams A, B and C. Team A is ready to merge changes into their development environment to make available changes to Team B's Team C's.

To ensure all development teams are working with the latest version of shared rule base, select and move all of the following tasks to the tasks List Order column and place them in the correct order.

The screenshot shows a user interface with two columns: 'Task List' on the left and 'Task List Order' on the right. The 'Task List' column contains five tasks: 'Teams B and C rebase the application rules within their local environment.', 'Automation server merges the branch to the system of record.', 'Automation server requests conflict detection.', 'Team A publishes the branch to the system of record.', and 'System of record triggers the job on the automation server.'. Between the columns are two sets of circular arrows: a right-pointing arrow and a left-pointing arrow on the left side, and an up-pointing arrow and a down-pointing arrow on the right side.

Answer:

Explanation:

Team A publishes branch,
Automation server merges three branch,
Team B and C rebase the application

Question: 2

What two features do activities and functions share? (Choose Two)

- A. Ability to be circumstanced
- B. Ability to be parameterized
- C. Ability to be called directly from a decision table
- D. Ability to be versioned

Answer: B, D

Explanation:

Question: 3

What are two valid reasons for defining a case type within a case type-specific ruleset? (Choose

- A. Case-specific rulesets make it easier to rebase ruleset versions.
- B. Each branch ruleset can be associated to case-specific user stories.
- C. The ruleset can be added to the ruleset stack for multiple applications.
- D. The case type might be converted to a component application in the future.

Answer: A, D

Explanation:

Question: 4

MyCo.com has instances of SCM-F5, SmartDispute, and CPM-F5 in their Production Environment distributed across multiple Pega instances. A new business requirement states that users working in any one application can create a case in any other application.

What is your recommendation to implement the new business requirement?

- A. Synchronize case creation with RFST services.
- B. Leverage database replication to communicate case creation.
- C. Implement Federated Case Management.
- D. Implement a parent case across multiple products.

Answer: C

Explanation:

Question: 5

You oversee a medium-size development team. Some of the team members are new to Pega and are working on features in a separate branch.

What are two ways you can ensure that the rules the team creates adhere to best practices? (Choose Two)

- A. Run 1 rarer on each new rule in the branch that new team members check in to identify any failures in rule execution.
- B. Leverage the branch review feature to have senior team members validate the branch contents.
- C. Use Pega Log Analyzer to locate any exceptions in the branch associated with the new team members.
- D. Review the branch quality to identify any rules with guardrail warnings.

Answer: B, D
