Version: 4.0

Question: 1

Big Corp uses an IdP (Identity Provider) to manage access for its members to its Plus plan on Slack. Their security team wants to make sure members will be automatically deactivated when they leave the company.

Which of the following must be true to ensure that members are automatically deactivated?

- A. Each member's access must be set to expire after 90 days.
- B. The member must not be a Workspace Admin or Owner.
- C. The member who is leaving the company must have left all channels.
- D. The IdP must support deprovisioning via SCIM.

Answer: B

Question: 2

What would be the expected behavior if a team member in Enterprise Grid is added to an IdP (Identity Provider) group with auto-provisioning enabled to a workspace?

- A. The member would be automatically added to the new workspace and would be unable to leave.
- B. The member would be notified that they have a new workspace that they can join and would be unable to dismiss it until they have joined the workspace.
- C. There will be no changes to the member's workspace list.
- D. The member would be automatically added to the new workspace unless it is a hidden workspace.

Answer: D
