

UiPath

UIPATH-ADPV1 Exam

**UiPath (ADPV1) Automation Developer Professional
Questions & Answers
Demo**

Version: 4.0

Question: 1

What are the primary functions of the UiPath Integration Service?

- A. Enables automation with a library of connectors, manages connections easily with standardized authentication, kicks off automations with server-side triggers or events, provides curated activities and events, simplifies automation design.
- B. Automates UI design, manages API connections, provides limited activities and events, simplifies automation design.
- C. Enables automation with API integration, manages connections with user-provided authentication, kicks off automations based on application-specific triggers, simplifies automation design with the help of third-party libraries.
- D. Enables automation with UI components, manages API keys, kicks off automations with client-side triggers, provides curated events.

Answer: A

Explanation:

Question: 2

What happens when closing a Remote Debugging Connection while a debugging execution is in progress?

- A. The remote robot continues the execution after Studio closes the connection.
- B. Debugging execution ends in exception, then the connection is closed.
- C. Debugging execution stops gracefully, then the connection is closed.
- D. It is not possible to close the connection while debugging is in progress.

Answer: C

Explanation:

Question: 3

Where is the TransactionNumber incremented in the REFramework?

- A. Only in the RetryCurrentTransaction.xaml workflow.
- B. Only in the SetTransactionStatus.xaml workflow.
- C. In the New Transaction transition.
- D. In the RetryCurrentTransaction.xaml workflow and in the SetTransactionStatus.xaml workflow.

Answer: B

Explanation:

Question: 4

Which logging level includes the following information by default?

1. Execution Started log entry - generated every time a process is started.
2. Execution Ended log entry - generated every time a process is finalized.
3. Transaction Started log entry - generated every time a transaction item is obtained by the robot from Orchestrator.
4. Transaction Ended log entry - generated every time the robot sets the transaction status to either Success or Failed.
5. Activity Information log entry - generated every time an activity is started, faulted or finished inside a workflow.
6. Arguments and Variables Information log entry - show values of the variables and arguments that are used.

- A. Verbose
- B. Trace
- C. Critical
- D. Information

Answer: A

Explanation:

Question: 5

How would you define a linear process in UiPath?

- A. The steps of the process refer to the execution of steps in a sequential manner, where each subsequent step depends on the successful completion of the previous step.
- B. The steps of the process are performed multiple times, but each time different data items are used.
- C. The steps of the process repeat multiple times over different data items. However, the automation design is such that each repeatable part processes independently.
- D. The process steps are performed only once. If the need is to process additional data, then the automation must execute again.

Answer: D

Explanation:
