UIPATH-RPAV1 Exam

UiPath RPA Associate v1.0 Exam

**Questions & Answers
Demo**

Version: 5.0

Question: 1

What do the Items in the Orchestrator queues consist of ? Select all the options that apply

Options are :

- A. Processes to be executed by the robots
- B. Jobs to be executed by the robots
- C. Input data for the processes executed by the robots

Answer: A, B, C

Question: 2

Which is the best way to delete un-referenced variables?

Options are :

- A. The unreferenced variables do not utilise memory, therefore you do not have to delete them
- B. You can manage your variables from the Design panel>Manage Variables>Remove Unreferenced
- C. Delete them one by one from the Variables panel. UiPath Studio performs the workflow validation in real time, therefore you can see which variable is being used

Answer: B

Question: 3

In which workflow in the UiPath Robotic Enterprise Framework template is the retry mechanism implemented?

Options are :

- A. The SetTransactionStatus workflow
- B. The Main workflow
- C. The GetTransactionData workflow

Answer: B

Question: 4

What happens in the Init state of the Main workflow, in the UiPath Robotic Enterprise Framework template?

Options are :

- A. The robot checks if the previous transaction is complete and then starts the next one
- B. The transaction items are extracted from the Queue
- C. The robot reads the configuration file and initializes all the required applications

Answer: C

Question: 5

When should the "Add Log Fields" activity be used?

Options are :

- A. When logs need to be enabled
- B. When a log message with a maximum number of five visible fields needs to be generated
- C. When the standard log message has to be customized by adding new fields to it

Answer: C

Question: 6

Where can we see the logs generated by running robots?

Options are :

- A. In the Orchestrator logs
- B. In the local Logs folder
- C. In the Output panel

Answer: A, B
